ABSTRACT:

CHG DATE=19990617 STATUS=O>A door leaf comprises elements (16, 20, 22, 24, 26, 30) which can be assembled individually. For this purpose, at least one longitudinal side (22) of the frame of the door leaf can be spaced from at least one transverse side (26, 28, 30), while remaining connected to this side, and can pivot out of the plane of the door leaf.

* Special categories of cited documents: ¹⁰

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the International filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the International filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
